Synthetic reference links

The invented sources [1-6] illustrate independent reference items. Compare (2).

A paragraph link remains intact: https://example.org/paragraph.

The reported volume and issue are 15(3). Results from 2020(1–3) are linked.

References

1. A. Arbor (2020). Synthetic channel measurements. https://example.org/first

2. B. Birch (2021). Constructed boundary results. doi:10.1234/invented

3. C. Cedar (2022). Authored destination. https://example.org/display

4. D. Dogwood (2023). A styled link. https://example.org/*styled*

5. E. Elm (2024). A URL followed by ordinary prose. https://example.org/inside is the location of this invented work.

6. F. Fir (2025). A final source without an external identifier.

Author references

O’Neill (2020) establishes the first result; O‘Neill (2020) describes the same work.

ONeill (2020) names a different author. D’Arcy (2021) is ambiguous.
